

The 12th International Conference on Uncertainty Modelling in Knowledge Engineering and Decision Making, August 24-26, 2016 - Roubaix, France

Call for papers - Special Session on Making decision under uncertainty in health care systems

Session Description

Healthcare' activities, changes in consumers' needs and expectations, new medical technologies,.. cause great uncertainty at all levels in health care decision making environment. In particular hospital managers, directors, planners and care workers are consistently required to make fast decisions in many areas of emergency care, where uncertainty and complexity are common. This special session is intended to provide a forum for decision makers, researchers, and graduate students to share and exchange their experiences, discuss original ideas, and report their research on all aspects of hospital sectors. Contributions emphasizing recent advances and new research directions are strongly encouraged. Submissions describing real case studies will be appreciated.

Recommended Topics

Researchers and practitioners are invited to submit complete original papers dealing with the following topics but are not limited to:

- Decision support systems,
- Activity based costing - activity based management,
- Simulation o healthcare services,
- Information system,
- Operating Theatre planning,
- Healthcare emergency management,
- Home health care and services,
- Human resources management,
- Stochastic modelling, ...

Instructions to authors

Papers reporting original research results and experience are solicited. Each paper, written in English, should has no more than 6 pages, including references and Illustrations. (For more details see: <http://flins2016.ensait.fr/submission.c4/>).

Important dates

Full paper submission: February 5, 2016

Acceptance notification: March 15, 2016

Final paper submission: April 15, 2016

For complete information, visit the FLIN'2016 Web Site at <http://flins2016.ensait.fr/>
